Brandon Gorson

Full Stack AI developer with a background in Psychology and a life-long dedication to learning. Effectively combine creativity and problem-solving skills to develop user-friendly products. Known among colleagues for strong collaboration and attention to detail no matter the complexity of the project. I am constantly excited by the opportunity to explore new areas of technology while building exciting products that impact users.

TECHNICAL SKILLS
JavaScript | Github | React | NextJS | TypeScript | GraphQL | React Native | Jest | Node Js| SQL| NoSQL | Datadog | Java

PROFESSIONAL EXPERIENCE

Sprout Social, Chicago, IL 11/2023- Present **Senior Engineer- AI/AI Experiences**

Led the development of high-performance web applications in a Full Stack capacity, working closely with cross-functional teams including Data Science, Designers and Project Managers to deliver scalable, user-centric features. Provided technical leadership, optimized code quality, and ensured alignment with best engineering practices.

- Developed and maintained web applications using TypeScript, JavaScript, React, Python and Java, ensuring high performance and scalability.
- Built completely new AI features in a Full Stack capacity that drove the highest customer requests in the company's history.
- Led technical discussions and provided strategic direction on code implementation, design patterns, and best engineering practices.
- Collaborated with data scientists, designers, and product managers to deliver impactful features and enhance customer experience.
- Contributed to the development of an internal UI library, improving consistency and efficiency across front-end components.

Dentsu, 2/2023-11/2023 **Associate Director of Engineering**

This was a full stack role that was responsible for leading and developing an internal tool for tracking resource allocation, its cost and forecasting future cost in multiple countries. The tool was built with a React frontend that sends requests to Amazon Lambda functions which interact with a Postgres database which is maintained by a Django infrastructure.

- Led two teams of engineers in the ongoing development and implementation of the internal tool
- Complete identified work across all areas of the application to complete roadmap targets.
- Identify stakeholder concerns and create sprint plans and roadmaps to meet the goals of the project.
- Setup all pipeline processes primarily through Github Actions such as linting, testing and deployment.

Foxtrot, Chicago, IL 7/2021 – 12/2022 **Senior Software Engineer**

I have a highly flexible position on the engineering team. Primarily I function as a front end developer and have been brought into other tasks/teams as needed for additional resources including building demo React Native applications, writing PHP/Python backend for our API and
designing automated QA end to end testing.

- Team lead for mid and junior level front end developers on the Foxtrot main e-commerce
- website.
- Collaborate with the product and design team to build the Foxtrot Anywhere, national
- shipping portion of the website resulting in a 439% increase in Year over Year growth. ●
- Responsible for helping scope work and identify potential blockers.
- Implement unit tests using Jest and monitoring using Data Dog and Sentry to ensure site
- functionality and performance.
- Review colleagues' work and provide feedback to ensure consistency and high code
- quality through Github.

Catalytic, Chicago, IL 7/2019 – 7/2021 **Software Engineer**
Implemented application features and debugged issues as assigned to improve the web-based automation software built with React and Node technologies.
Responsible for implementing front end features, bug fixes and automated tests for the main web application using React, GraphQL and a variety of third party libraries.

- Created abstract React components that were used across multiple areas of the
- application.
- Collaborated with front end team of engineers and designers to implement new features,
- develop roll out strategies for projects and improve currently implemented features.
- Utilized Github for all project additions and changes.
- Wrote Javascript scripts for the Catalytic in-house software to solve complex, specific
- customer needs.

2U Full Stack Bootcamp 11/2021 – 4/2023
Teaching assistant for 6-month online bootcamp. Responsible for mentoring and teaching prospective students essential programming knowledge.

- Meeting one on one with students to resolve coding issues
- Provide feedback to students on code quality and strategies to optimize
- Teach students new concepts

EDUCATION
Northwestern Professional Studies, Chicago, IL; 2019
Argosy University, Schaumburg, IL - **Master of Arts, Community Counseling**
Illinois Wesleyan University, Bloomington, IL - **Bachelor of Arts, Psychology**
